Fig. 3

Fig. 4

The figure consists of several schematic diagrams labeled 'a' through 'g' and a scale bar. The diagrams illustrate the experimental setup for measuring the time delay of the electron beam. The setup is divided into two main sections: 'Electron Beam' and 'Measurement'. The 'Electron Beam' section shows the beam's path from the cathode to the collector. The 'Measurement' section shows the beam's path from the collector to the detector. The diagrams are labeled with 'a' through 'g' and include a scale bar of 1 cm.
